

ARCHITECTURE OF GRACE

Universal Check-In — Pilot Quick-Start

For Teachers

Run your first check-in in about five minutes. No login, no code.

1. Open the site

Go to architectureofgrace.org on a laptop, tablet, phone, or interactive board. It works offline once it has loaded.

2. Start a check-in

Tap **Take the Check-In**, choose **Student Check-In**, then select a grade band and **Quick** or **Thorough** mode.

3. Let students answer

Students can use their own devices or pass one around. Their answers stay on each device — nothing is sent anywhere.

4. Read the group

Open the **Dashboard** (top bar) → Overview and Class trends. Individual scores stay private on purpose.

5. See the tiers

Go to **Dashboard** → **MTSS Report** (gold button). No data yet? Tap **Load demo data** to explore it instantly.

Then fill out the Teacher Feedback Form — what confused a student or broke is the most useful thing you can tell us.

Thank you for helping us make this better for real classrooms.
