

The Cohort Map

A Twelve-Year Longitudinal Ecosystem

Most SEL curricula give you a lesson plan.
We give you a childhood.

Over twenty years in the classroom, we followed ten students from their first day of school into adulthood. We watched them learn the difference between an “Oops” and “I am bad.” We watched them wrestle with their Inner Critics. We watched them calculate the cost of their curated selves. We watched them walk out of the final room and into the rest of their lives.

The Architecture of Grace is built on a single narrative spine. Teachers don't just learn tools — they meet Marcus, Amara, Sofia, Priya, Darius, Jordan, Maya, Theo, Mia, and Kezia. They watch these ten children grow up across six rooms. In doing so, they learn exactly how to hold the room for the children sitting in front of them.

THE EXHIBITION — SIX ROOMS

12

GRADES K-2

The Foundation • *Meet Maya*

Sammy the Frog · *The Mistake Wall*

The quiet one. The girl who looked at the floor in September, and drew a picture of herself looking up in October.

18

GRADES 3-5

The Framework • *Meet Priya*

Inner Critic vs. Inner Coach · *The Toolkit*

The list-maker. She filled her Inner Critic column in three minutes — then had to learn to write the Coach's reply.

36

GRADES 6-8

The Interior • *Meet Jordan*

Mask vs. Mirror · *The Digital Backpack*

The load-bearing funny. The kid learning that being funny was both a gift and a cost.

104

GRADES 9-10

The Façade • *Meet Marcus*

The Performance Tax · *The Identity Shield*

The truth-teller. Carrying a stone he picked up at six — learning, at last, to set it down.

207

GRADES 11-12

The Capstone • *Meet Amara*

The Exit Interview · *The Final Backpack Audit*

The bench-sign kid. She lost the election — and built the system that holds the door open anyway.

—

NO NUMBER • ADULT

The Dwelling • *Meet Kezia*

The Table · *The Going-Around*

The line-holder. Learning that forgiving someone is not the same as letting them back in.

*“The architecture’s true test comes in adulthood, when the load gets heavy.
The room with no number.”*
