

PILOT QUICK-START

Self-Reflection

For Teachers & Educators

Run your first self-reflection in about five minutes. No login, no code.

1 Open the site

Go to architectureofgrace.org on a laptop, tablet, phone, or interactive board. It works offline once it has loaded.

2 Start a self-reflection

Tap Begin Self-Reflection, choose Student, then select a grade band and Quick or Thorough mode.

3 Let students answer

Students can use their own devices or pass one around. By default, answers stay on each device — nothing leaves it unless your school turns on optional Google Sheet sync.

4 Read the group

Open the Dashboard (top bar) > Overview and Class trends. The class view is aggregate — but you can open any individual student, and if your school has sync turned on, that response is in the school's Sheet too.

5 See the tiers

Go to Dashboard > MTSS Report (gold button). No data yet? Tap Load demo data to explore it instantly.

Pair it with the Calm & Regulation Tools

Under Explore > Calm & Regulation Tools you'll find short, guided resets — breathing, Take 5, 5-4-3-2-1 grounding, movement, and more. They're the bridge between noticing and doing: Right Now opens straight into the matching tool for the moment, and when the Self-Reflection shows a domain running low, these are the one- or two-minute resets that help someone settle before getting back to learning.

Next: Fill out the Teacher Feedback Form — what confused a student or broke is the most useful thing you can tell us. Thank you for helping us make this better for real classrooms.
