

QUICK-START · FAITH-BASED & MINISTRY

Use it in your community

Use the secular self-reflection in a congregation, ministry, or faith-based school. The optional Faith Companion adds faith language you can turn on — and off.

1 Open the site

Go to architectureofgrace.org on any device. No account, no login; answers stay on the device.

2 Know what stays secular

The four pillars — Identity, Self-Compassion, Forgiveness, Grace — and every lesson stay fully secular by default, so the tool works for everyone in your community.

3 Turn on the Faith Companion (optional)

Open the Faith Companion and toggle it on — it's off until you choose it. Pick Non-denominational values language or the Christian (Divine Edition) with ESV scripture anchors. A printable handout is included.

4 Run it with your group

Use it in a youth group, family ministry, or class. A leader can run a group self-reflection; nothing is collected or sent.

5 Keep it yours

The companion lives only on your device and can be turned off anytime, returning everything to the secular core. The Divine Edition supplements — never replaces — your chapel and theology. Then tell us whether the secular core + optional faith layer felt respectful and useful for your community. Private & on-device by default — no account, no login, no tracking. Nothing is sent anywhere unless you choose to share it.
