

Architecture of Grace

The Live Demo Playbook

A 10-minute and a 5-minute walkthrough — plus how to show the dignity split

The golden rule: they touch it, you stay quiet. Aim to talk for less than half the time. One result path, one idea at a time, then hand the device back.

The 10-Minute Demo

Before you start: site open to the home screen on a device you can hand over · pick the one audience hook from your card · plan to steer toward the “running low” tank result (it best shows the tool responding with care).

0:00–0:45 Frame, then ask. — “Architecture of Grace is a framework for building a lifelong relationship with yourself and others — through identity, self-compassion, forgiveness, and grace. Let me show you in ten minutes.” Then: “What’s your biggest headache with student or staff wellbeing right now?” Listen.

0:45–2:30 Hand them the device. — “Take the 60-second ‘How full is your tank?’ — answer honestly, it’s private.” Say nothing while they tap. This is the most important 90 seconds.

2:30–4:00 The reveal: the next step. — “Notice — no score. A next step.” Point to the one concrete thing it surfaces. “Most tools tell you that someone’s struggling. This tells you what to do next.”

4:00–5:30 Same tool, two people. — Toggle Child ↔ Adult. “A child only ever sees warmth; the clinical detail stays with the adult who can hold it. Same tool, two appropriate experiences.” (See the last page for exactly what to point at.)

5:30–7:00 Show it reaches everyone. — Toggle read-aloud (let them hear it), turn on picture answers, flip to Spanish. “Built so a first-grader and a fluent adult both get all the way through.” Three quick toggles, no over-explaining.

7:00–8:00 One tool, briefly. — Open the Quiet Space or Inner Coach. “When someone’s in a hard moment, there’s somewhere to go.” Thirty seconds. Pick one — don’t tour them all.

8:00–9:00 Privacy, said plainly. — “No accounts, and nothing they entered ever left this device. Nothing stored, nothing sent anywhere.” For admins and district leaders, this is the close. Let it sit.

9:00–10:00 Stop, then ask. — “That’s the whole thing.” Then: “Would it be worth piloting with one group?” or “Want me to send the one-pager?” Then quiet.

ADAPT THE EMPHASIS, NOT THE STRUCTURE

Counselors → linger on the two-audience reveal. Admins / district → linger on privacy. Parents → linger on the warm result and the take-home line. Coaches / staff → the tank check basically is their demo.

The 5-Minute “Elevator” Demo

Same DNA, fewer beats. The one cut that matters: pick a single “power move” instead of showing everything.

0:00–0:30 Frame + one question. — “Architecture of Grace is a framework for building a lifelong relationship with yourself and others — through identity, self-compassion, forgiveness, and grace. Give me five minutes.” Then your one question. Their answer tells you which power move to use.

0:30–2:00 Hand it over. — “Take the 60-second tank check — answer honestly, it’s private.” Say nothing while they tap. Still the heart of it.

2:00–3:00 The reveal. — “No score — a next step.” Point to the one concrete thing. “This tells you what to do next.” Let it land.

3:00–4:15 One power move (pick from their answer): — Counselor / clinician / teacher → the dignity reveal (toggle Child ↔ Adult). Admin / district → privacy (“nothing left the device”). Parent → the warm take-home line. Choose ONE. Don’t do two.

4:15–4:45 One inclusion flash. — A single toggle: read-aloud speaking, or flip to Spanish. “Built so everyone gets all the way through.” One toggle, not three.

4:45–5:00 Stop, then ask. — “That’s the whole thing.” Then: “Worth piloting with one group?” Then quiet.

WHAT YOU CUT FROM THE 10-MINUTE VERSION

The second audience walkthrough, the standalone tool tour, and any feature you’re tempted to add “real quick.” In five minutes, the discipline isn’t what you say — it’s what you leave out.

How to Show the Dignity Split

"A child only sees warmth; the clinical detail stays with the adult." This isn't a setting you flip — it's automatic, driven by who the check-in is for. The Grace Compass result renders in one of two modes:

STUDENT-SAFE MODE	PRACTITIONER MODE
K-12 / student record	Adult / Educator record
Warm headers only: Your next step · A story that meets you here · Take this home.	Same core, plus the clinical layer: the ★ / ★★ risk flags, the suggested protocol, and the resource detail.

THE DEMO MOVE (≈40 SECONDS)

1. Take the Self-Reflection choosing a grade (K-12). When the result appears: "This is everything the child sees — warm, a story, one thing to take home. Notice what's not here."
2. Take it again as Adult / Educator. Same result area now shows the practitioner version: "Same engine, same kind of answers — but now the risk flags and the protocol appear. That's the layer a child never sees."

WHAT APPEARS / DISAPPEARS BETWEEN THE TWO

- The ★ / ★★ risk markers by the heading
- The protocol / risk note
- The fuller resource detail

All three are present in the adult view and simply absent in the student one.

THE DEEPER VERSION (FOR COUNSELORS)

The same student record also shows the full clinical compass on the staff dashboard report — so a child sees warmth on their device, while the counselor pulling up that same record sees the flags. Same data, two audiences, enforced by the tool.

IF A TECHNICAL BUYER ASKS "IS THAT REAL, OR JUST HIDDEN WITH CSS?"

It's real. The engine is called with a "self" flag that removes the clinical content for students — it's never generated for the student view at all. Nothing sensitive is rendered-then-hidden; it simply isn't produced.

They touch it. You stay quiet. One idea, one ask, then silence. · architectureofgrace.org
