

ARCHITECTURE OF GRACE

A project of The Architecture of Grace Foundation - architectureofgrace.org

PILOT PROGRAM

Start with one class. See it work in a semester.

A privacy-first SEL & MTSS tool that turns a four-minute student check-in into multi-year growth, IEP-ready goals, and one shared language between school and home - at a fraction of the cost of layered enterprise platforms.

Three jobs, one tool

The Daily Pulse - a private, never-scored check-in. The Smart Screener - the same reflection scored to MTSS tiers with a multi-year growth trajectory. The Actionable Content - every flag maps to the exact lesson, anchor chart, and companion novel.

The closed loop

Assessment - insight - goal - support - re-measurement, in one flow. A teacher generates a relationship-centered IEP goal from a real check-in, with objectives by reporting period, and monitors progress on the same screen - copy or print, ready for the IEP system.

Built for trust

Relationship-centered, never deficit counts. Privacy-first and on-device by default; a school connects its OWN Google Sheet - nothing student-identifying is stored by us. Bilingual (English / Spanish). Built by a practicing special educator, for real classrooms.

What a pilot looks like

One class or caseload. One semester or a full year, with Fall / Winter / Spring check-in windows of about four minutes each. We provide the quick-starts, the Sheet template, and the Goal Builder; you bring the students and your judgment.

What we ask

Run the check-in windows, try the Goal Builder on a few students, and share short feedback on what helped and what got in the way. That is the whole commitment.

The ask: Let us set up one class with you this term. Five minutes to start; a semester to see growth.

Contact through architectureofgrace.org - we will bring the quick-start kit and walk your team through the first window.

Honest note: measures are provisional and not yet a validated instrument - a flag for support, not a diagnosis. Family and IEP data use should be reviewed by your district counsel and IT before deployment.
