

QUICK-START

For Parents & Families

Welcome. Here is the five-minute way to check in at home - and to watch your child grow over time, in the same language their school uses.

1 Open the site

Go to architectureofgrace.org on your phone, tablet, or computer.

2 Set up Family Mode

Begin Self-Reflection - Family Mode, and add each family member once.

3 Check in together

Let your child answer honestly - there are no wrong answers.

4 Talk it through

Read the results together and use the conversation starters (you can print them).

5 See growth over time

Family Mode tracks each child across check-ins, so you can see growth - the same Trajectory a school sees, for your family. A gentle path from rupture to repair, at home.

6 Keep it yours

Nothing is sent anywhere. Use Personalize (sliders icon) to set the Word of Grace to Child or Teen.

TRY THESE - new and worth it

* See home and school together

Ask your school to compare in Trajectory, then Both - your child's home and school growth on one chart, in the same language.

* The What helps me picker

On the results screen your child saves what calms them; it returns the next time they check in.

Want more? The Grace at Home and Grace for Parents pages walk you through it, with printable conversation starters.
