

QUICK-START

For Specialists & Support Staff

A five-minute orientation for counselors, psychologists, social workers, SLPs, OTs, and behavior staff - across tiers.

1 Open the site

Go to architectureofgrace.org (laptop, tablet, or phone). It works offline once loaded.

2 See how it connects

Explore the Framework - the four pillars and how one answer becomes a next step.

3 Run a check-in

Begin Self-Reflection - Student - grade band - Quick or Thorough, with a student you support.

4 Open the MTSS report

Dashboard - MTSS Report (gold button) for tier movement and an auto summary. No data? Load demo data.

5 Build the goal

Goal Builder: pull a student's saved check-in, generate a relationship-centered goal plus objectives by quarter, trimester, or semester, with a progress measure that is a flag for support, never a deficit count. Copy or print for the IEP.

6 Monitor progress

Right under the goal, a chart shows movement toward the target band across windows; the Trajectory tab shows the full multi-year picture.

TRY THESE - new and worth it

* Home + School overlay

Trajectory, then Both, shows a student's school and home lines together - a fuller picture for a meeting, with a printable summary.

* Link as same child

Pair a school code with a home member once; the combined view reopens to them automatically, on that device only.

Tried it? Open the Pilot Program page and tell us what helped and what got in the way.
