

QUICK-START

Universal Check-In

For Teachers & Educators

New to Architecture of Grace? Here's the five-minute way to run your first check-in with a class.

1

Open the site

Go to architectureofgrace.org on a laptop, tablet, phone, or interactive board. It works offline once it has loaded.

2

Start a check-in

Tap **Take the Check-In**, choose **Student Check-In**, then select a grade band and **Quick** or **Thorough** mode.

3

Let students answer

Students can use their own devices or pass one around. By default, answers stay on each device — nothing leaves it unless your school turns on optional Google Sheet sync.

4

Read the group

Open the **Dashboard** (top bar) › Overview and Class trends. Individual scores stay private on purpose.

5

See the tiers

Go to **Dashboard** › **MTSS Report** (gold button). No data yet? Tap **Load demo data** to explore it instantly.

Pair it with the Calm & Regulation Tools

Under **Explore** › **Calm & Regulation Tools** you'll find short, guided resets — breathing, Take 5, 5-4-3-2-1 grounding, movement, and more. They're the bridge between noticing and doing: **Right Now** opens straight into the matching tool for the moment, and when the **Check-In** shows a domain running low, these are the one- or two-minute resets that help someone settle before getting back to learning.

Tried it and want to share how it went? Open the **Pilot Program** page, choose your role, and send feedback — fill it out online right there, or print the form.

Thank you for starting here.
